

THE SPACESHIP EARTH™ DYMAXION™ GLOBE

INSTRUCTIONS FOR ASSEMBLY

1. Punch out map along dashed lines.
2. Place map, face down, on any flat surface. Fold and crease all marked lines. Smooth, straight folds are important. Now you are ready to begin assembling your Spaceship Globe.
3. Insert tabs A into slot A. Continue with B to G, D to E, and so on through L to M. There should be no overlap or gaps in the edges of the map.
4. Assemble the base by inserting tab into slot M.

This starts as a flat sheet then when cut out and folded it makes a globe.

Music: Importance in History

Music may be the universal language of mankind. Old Time Music was an enjoyable part of our history.

Importance: Forms of Music were used for important signaling and in managing wildlife. It has been used as a weapon. It was used against a fugitive (Noriaga) holed up for days until he gave up as he could not sleep or stand it any longer. Horns, whistles, drums, bells could be used to communicate over distances. But mostly music was used for enjoyment and inspiration. Most people enjoy their favorite forms of music. People have been inspired to think, to write, to take action, to go into battle or go to sleep because of music. It is a transporter of local and national culture. Early settlers were too busy trying to survive. But after farms were well established music gave people much pleasure. The most common instruments used by the early and middle 1800s farmers were: horns from cattle, flutes, whistles, fifes, drums, fiddles, concertinas, ocarinas, bells and the king of instruments the organ. With exception of concertinas fiddles and organs many instruments were hand made. They were played at social events like family visitations, holidays, fairs, barn raisings, quilting bees, harvesting bees, "singins," sugar hops for young people to meet etc. Sometimes a local store would encourage a musician to sit nearby and play. Sunday and Wednesday church events were the most common. See Farmers Diary. In August of 1920 the first News was broadcast by station 8MK in Detroit, Michigan, now WWJ. In October 1920 2ADD (renamed WRUC in 1947), aired what is believed to be the first public entertainment broadcast in the United States, a series of Thursday night concerts initially heard within a 100-mile radius and later for a 1,000-mile radius. Soon music was heard through out the USA. By the 1920s many schools were offering some music education. Families who really cherished music also bought instruments and hired tutors. Such as Ms Wright in Warren Village. Homer Hazelton who led the 1929 Busch Band. St Clement school had a band. My mother played in a community band in 1940s. Alton C Powell was a band leader in Center Line in 1940s-50s. Later D. Maria and J. Kohler. We need a volunteer researcher to find more. Leonard Schimm was band director at Fitzgerald Schools in 1980s. Jeff Cotter was a band director at Warren consolidated and later led the Warren Symphony. In the main article and website <http://dogoodforall.today> are links to hearable videos of many of the most popular instruments used here. Mammoth bone flutes were used by early Indian peoples. The pride and joy of many early families and churches was often their organ. This was usually a foot pumped pedal organ. A late appearing very common instrument since around 1830 was the harmonica. While often put down as a toy, it was in fact a true musical instrument capable of bringing a lot of joy or misery to those in range of its sounds. It has indeed been used by many musicians around the world and at Carnegie Hall. Although it has limitations, such as key and range, there are many types of harmonicas which can overcome this. There are many other instruments. See the main article page 1353.

TO HELP ILL NEIGHBOR

PLOWING BEE TO HELP SICK NEIGHBOR

Thomas Jefferson wrote the Declaration of Independence served our country in many high offices and founded a university.

Thomas Jefferson knew much about government because he himself studied the previous failed attempts at government. He understood actual history, and the nature of man. That happens to be way more than what most understand today. Jefferson really knew his stuff. It is worth noting here a few things he had to say. John F. Kennedy held a dinner in the white House for a group of the brightest minds in the nation at that time. He made this statement: "This is perhaps the assembly of the most intelligence ever to gather at one time in the White House with the exception of when Thomas Jefferson dined alone."

Here are a few quotes from Thomas Jefferson :

If a nation expects to be ignorant and free, in a state of civilization, it expects what never was and never will be.

The democracy will cease to exist when you take away from those who are willing to work and give to those who would not.

Thomas Jefferson said in 1802: **I believe that banking institutions are more dangerous to our liberties than standing armies.** If the American people ever allow private banks to control the issue of their currency, first by inflation, then by deflation, the banks and corporations that will grow up around the banks will deprive the people of all property - until their children wake-up homeless on the continent their fathers conquered.

My reading of history convinces me that **most bad government results from too much government.**

No free man shall ever be debarred the use of arms.

The strongest reason for the people to retain the right to keep and bear arms is, as a last resort, to protect themselves against tyranny in government.

All tyranny needs to gain a foothold is for people of good conscience to remain silent.

For a people who are free, and who mean to remain so, a well-organized and armed militia is their best security.

The care of human life and happiness, and not their destruction, is the first and only object of good government.

It is incumbent on every generation to pay its own debts as it goes. A principle which if acted on would save one-half the wars of the world.

I predict future happiness for Americans if they can prevent the government from wasting the labors of the people under the pretense of taking care of them.

We hold these truths to be self-evident: that all men are created equal; that they are endowed by their Creator with certain unalienable rights; that among these are life, liberty, and the pursuit of happiness.

A Bill of Rights is what the people are entitled to against every government, and what no just government should refuse, or rest on inference.

History, in general, only informs us of what bad government is.

A wise and frugal Government, which shall restrain men from injuring one another, which shall leave them otherwise free to regulate their own pursuits of industry and improvement, and shall not take from the mouth of labor the bread it has earned. This is the sum of good government.

All, too, will bear in mind this sacred principle, that though the will of the majority is in all cases to prevail, that will to be rightful must be reasonable; that the minority possess their equal rights, which equal law must protect, and to violate would be oppression.

Educate and inform the whole mass of the people... They are the only sure reliance for the preservation of our liberty.

Every citizen should be a soldier. This was the case with the Greeks and Romans, and must be that of every free state.

Thomas Jefferson

I was bold in the pursuit of knowledge, never fearing to follow truth and reason to whatever results they led, and bearding every authority which stood in their way.

If Congress errs in too much talking, how can it be otherwise in a body to which the people send one hundred and fifty lawyers, whose trade it is to question everything, yield nothing, and talk by the hour?

Every government degenerates when trusted to the rulers of the people alone. The people themselves are its only safe depositories.

Experience hath shewn, that even under the best forms of government those entrusted with power have, in time, and by slow operations, perverted it into tyranny. Experience demands that man is the only animal which devours his own kind, for I can apply no milder term to the general prey of the rich on the poor.

He who knows best knows how little he knows. Be polite to all, but intimate with few.

I am an Epicurean. I consider the genuine (not the imputed) doctrines of Epicurus as containing everything rational in moral philosophy which Greek and Roman leave to us.

I believe that every human mind feels pleasure in doing good to another.

I hope we shall crush in its birth the aristocracy of our monied corporations which dare already to challenge our government to a trial by strength, and bid defiance to the laws of our country. I know of no safe depository of the ultimate powers of the society but the people themselves; and if we think them not enlightened enough to exercise their control with a wholesome discretion, the remedy is not to take it from them but to inform their discretion.

I like the dreams of the future better than the history of the past.

Leave no authority existing not responsible to the people.

It is in our lives and not our words that our religion must be read.

No occupation is so delightful as the culture of the earth, and no culture comparable to that of the garden.

Rightful liberty is unobstructed action according to our will within limits drawn around us by the equal rights of others. That government is the strongest of which every man feels himself a part.

The constitutions of most of our States assert that all power is inherent in the people; that... it is their right and duty to be at all times armed. No freeman shall be debarred the use of arms.

When the people fear the government, there is tyranny. When the government fears the people, there is liberty

Nothing gives one person so much advantage over another as to remain always cool and unruffled under all circumstances. When angry count to ten before you speak. If very angry, count to one hundred.

One man with courage is a majority. One travels more usefully when alone, because he reflects more.

Only aim to do your duty, and mankind will give you credit where you fail.

When we get piled upon one another in large cities, we shall become as corrupt as Europe. Commerce with all nations, alliance with none, should be our motto.

When you reach the end of your rope, tie a knot in it and hang on. Thomas Jefferson

Honored Historians

These wonderful people have helped preserve our local history.

You can be an honored Historian. If you are willing to look up things and type up what you found. Send then to wecare@dogoodforalltoday I will put you down as the historian for that item and publish you in this history giving you the credit. Old professor Wes started this but now it is a community history project that all serious historians can help with. Help us. Be a Hero Historian. Your name will be recorded for posterity.

Norman Smith

Fire Chief of Center Line, Goodfellow, Historian, Fireman
He has helped many people. He has overseen and cared for the St Clement Cemetery for years. He is a true inspiration to us all.

Mike Grobbel

Historian Researcher and author of the first and best site on Center Line History. He continues to do excellent research and publish it at his own expense. He is a wonderful person to work with. He has helped many others.

Jack Schram

Who researched history of transportation in our area and collected and shared his pictures. He published books on Transportation. His son Ken has been very helpful.

Jerry Malburg

St Clement historian/genealogist helped create the 6,500 entry Index to St Clement Cemetery

Pat Hallman

She has done work all over Macomb County. The Bunert School exists today mostly because of her labors. Research on the Bear Creek mansion was done by her. There are several other studies she has done that has benefited those interested in history. We owe her a great dept of gratitude for her great work.

Tom Turmel

Who had done much historical work and beautified our lives and cared for many people and plants. He spent years transforming Warren Union Cemetery into a place of beauty.

Martha Ruth Burczyk

Who did historical research and still has the Friendliest Book on Warren History

Merriann Haberek

Compiled a book about early days of Baseline and Van Dyke entitled "A Moment in Time A Lifetime of Memories"

Anna Kluck

Anna wrote historical articles and interviewed old timers. Unfortunately she did not share her research. I am hoping that perhaps her relatives inherited her research and will share it.

Special Thanks to the following for their good works and sharing of historical information.

Shirley Opfer, Jenny Horn, Bert Hazen, Harold Stilwell, Kathy Kirchner, Dorothy Cummings, The Weigand Family, Eugene Mandziuk, William Leroy, Margaret Licht, David Hanselman, Kurt Mccrary, Hubert and Dorothy Leech, Lislle Foss and others whose names I forgot.

Thanks to all those who gave their lives and served to preserve our freedom

Author, College Professor, Humanitarian,
Historian, Scouter, Social Worker
Photographer Wesley E Arnold

Many people have asked about me for this so since I probably don't have long to live (age and medical problems), here reluctantly is my info which is better to have correctly recorded than my enemies account. I do have enemies because I at least have had the courage to stand up for what is right and for our freedoms and against those who threaten them. They have told me I will have a fatal accident, but I think diabetes, the silent killer, will get me first. I will as will all of us soon be forgotten. **Professor Wesley Edward Arnold is the old Historian and Humanitarian Educator who researched much of this work before there were computers.** He was a college Professor who received a 20 year Distinguished Service Award from Macomb Community College, compiled over 180 books (most on local history and a few with his Doctorial research on finding and using International Vocabulary the easiest language and most important about practical solutions to the problems of our time. In his last years he promoted practical solutions to providing every human with: adequate food, clothing, affordable shelter, adequate health care, better education, human rights, and a practical method to create a statewide minimum income for all by using public owned solar panels to provide energy credits for every citizen.

He also built and maintained his own personal solar power system and helped others create them. He wrote International Vocabulary for International Communication and Understanding in 1/10 the time, was a Red Cross Volunteer and Social Worker, Scout Leader, and Educator. He compiled the 30,000 page Educational Archive of Warren and Center Line History and published it without cost to others. He was a veteran of US Army Vietnam Era, and a soldier in the War on Terrorists. People liked his website dogoodforall.today with the history and the beautiful old music videos. He taught the Golden Rule as a standard of human conduct, warned us about dangers and urged persons to be, informed, educated and prepared.

He felt his greatest book with the greatest possibility of doing the most good was a little 40 page mini book entitled: "Be a Success with Proven Success Practices Based on Experience of Experts." He usually gave away all of his books for free. Except Amazon won't let one do that so they are mostly all 99¢

We thank him and other veterans for their service and for having the courage to stand up against the those who are threatening our freedom. Remember Humans are Humane monsters aren't, cause no harm by actions or inaction.

To the right is his Stone at Forest Lawn

Computers have increased in power and decreased in size so that soon they will fit into a pair of glasses or be worn on our wrists or on clothing and may be implanted in our bodies to provide us with additional capabilities and information. **Bots can and will replace “experts” in many fields and many white collar executive positions.** Expert projections tell us to **expect to see 60% of current jobs automated by bots** and robots in the next decade and upwards of 90% within 60 years. Very few new jobs will be created so this is going to free up humans from having to go to work.

We will need to change our economic system to a resource based system. One idea is to use taxpayer money to set up solar panels nationwide (using prisoner labor at no additional cost) then divide the output of kilowatts by the number of US Citizens and every person would have solar energy credits to use like money. Make each citizens share enough to live on. **There is ample solar energy that hits the USA every day to provide much more than we need** even including giving us free fuel for everyone's electric cars. **Tell congress to start making this happen. But the US Congress no longer represents the American People. They should be term limited to one term only, and no special pensions, no special health care. NOW!**

Solar panels can be had for around \$100 for a 100 watt panel. Add \$90 battery, \$30 regulator and \$30 inverter will give your house lights, run a TV and laptop computer and charge up all of your fones. I already get a lot of my power for free and the best part is that I never have to worry about a power outage again. *We love our independence.* We must make sure the government doesn't get their greedy hands in this. I am researching getting an electric car I can charge up with my free fuel. \$399 gets you an electric scooter. Autonomous cars will drive us or pick up the kids much more safely than human drivers and will talk with other autos. Human drivers **kill thousands** of innocent humans every year.

The Internet of Things is coming like it or not. “Things” will have computer chips and will “talk” to other things. The refrigerator will tell your smart fone what needs to be ordered from the grocery store and the fone will automatically order those items to be picked up by your autonomous car. Your house will automatically adjust the temperature, lights, music etc. or you can just speak to your house and request it to make any change you want. Your implanted RFID chip will allow you to make purchases without money and will unlock your car or house upon your approach. Paper money is being replaced by electronic money (which can be controlled by Big Brothers.) Very little is now purchased with paper money which is no longer backed by gold or silver and may become nearly worthless as the federal government is so over its head in debt that it can barely keep up its payments to China who bought much of its debt. **China now uses our debt payments to finance its military which may surpass the US military. China educates its bright children while the USA has cut education so much that the US kids are actually behind most other countries. In fact the US no longer produces enough engineers to meet its needs and has to import foreigners to fill positions. What a disgrace. China is about to surpass the US in technology and economics.**

Personal Bots and robots will do tasks for you, such as finding information, making calls, mowing and cleaning, watch the kids, teach and entertain them. Robots can also be companions and pets that show love and kindness, and do work for us and perhaps even defend us. Japan already has robots for sale that take this companionship quite a bit further (never gets a headache) get my meaning. What? with a machine not me. Hey Roboto! Clean the house, take out the garbage, wash the dishes and car and mow the lawn. The wife and I are going to take a nap. Bots and robots taking over most work will free up humans for a wonderful creative life with endless wonderful possibilities of things to do and enjoy. The trans-human era is beginning. We already have hip, and eye implants and soon there will be other artificial body parts. Computer chips and medical devices inside the head are already being used to tame epilepsy and Parkinsons. Soon they will cure blindness and deafness and supplement our sight, memory, hearing and do other things for us. Human life expectancy will increase. Robotic exoskeletons allow soldiers to lift heavy weights. Robots will become soldiers. Drones will deliver packages and spy on us. RFID powder will allow tracking of everything and everybody all fed into Big Brother's databases including all of your Internet use, fone, financial, locations and more now being recorded just like your driver's license picture is now. along with coming ubiquitous public camera surveillance. They are listening and watching getting ready to control us. Our children may be immortal robots with super artificial intelligence surpassing all of the foolish human race. Unless humans now act wisely and with compassion they will cause their own extinction causing a post-human era with wise artificial intelligence taking over the planet. Email me tell me what you think.

Contemporary History appears to be more important than old time history because of the rapid advancement of technology and of change which is accelerating which is impacting our lives today. (I teach about Technology at the College level.) So first we must be aware of what is going on meaning its history of how it is affecting others not just us and learn from that so we can take the wisest and best actions for a better future. Example automation taking over human jobs. A threat to one could eventually be a threat to many including us. So if we see that automated computer programs given artificial intelligence are enabling those programs to learn most human jobs then we should seek other jobs that are not going to be automated and encourage our children to think about that also to avoid financial disaster.

Thousands of human workers are soon going to have their jobs automated. Example ATM s and automated store check outs replacing thousands of tellers and cashiers and soon store stockers and inventory along with most fast food workers as machines replace people. Professional drivers 3 million of them will be mostly replaced by autonomous vehicles. Employers will go with computers and machines as to do work because they work 24/7 without pay, vacation, breaks and never call in sick. New pharmacy machines fill thousands of prescriptions and check drug interactions even while the store is closed in the lights are turned out. And it does this without mistakes and without pay.

Automation is here like it or not. Machines with AI will soon replace humans in 60% of today's jobs but without creating new jobs unlike in the past. This will cause massive unemployment. So we will have thousands of people going on welfare because of no jobs being available. We simply cannot support half of the population on welfare.

So we will soon **need a basic income for all**. How can this be done? A good way is use free income we get every day. Have the government put up solar panels nation wide to get free solar power daily. Have the electric companies buy this power and put the huge profit into a fund. And then give every citizen an equal financial credit share of this fund. This can provide at least minimum income for all citizens including children. This could finally end welfare. And everyone would still be free to work. Use free prison labor to install the panels. Prisoners could learn useable skills so they can support themselves later. The only one against it would be the electric company but they are supposed to be a public utility anyway and work for us. And they would still make some profit by selling energy from their own sources. So this can be a win win for everyone. We just have to keep the greedy special interest groups out of it.

We have been able in America to create abundance for all. Just go to a Walmart. They have almost everything most people want and need except affordable health care, housing, and cars. Builders want to just create expensive housing because they make more money from higher income people and that leaves thousands of others without housing but cities can require a percentage of new housing to be for low income and they can repurpose unused buildings for housing. Some cities are paying homeless to pick up trash and do other needed jobs and some are given free shelter or placed in new tiny home areas for working. We also need adequate emergency shelters. We should also promote the prefab housing industry. Housing factories and machines can make a house much faster and much cheaper than the old ways. It then can be set up on a lot without skilled labor with great savings in costs. In tornado areas strongly made **geodesic dome buildings can be made strong enough to withstand tornadoes**. Our area has at least 1200 homeless. Many are families with children. This is America in 2020 this should not be happening. This has many causes such as lack of planning lack of caring lack of education and all this impacts people especially children. Right here in warren ½ population is below the poverty level and **one in five children in Warren go to bed hungry at night**. This can be fixed if we just make the effort. Government can be the employer of last resort if need be, with public service jobs. We should establish Workfare in place of welfare. Everyone getting handouts except those in major medical care, should be required to work. End the multiple thousand dollar handout to immigrants. Limit the number of wives we support to one. This thing of us having to support with food, shelter and medical multiple wives is an abuse as is having to support on welfare multiple relatives and alleged children being brought in. Us taxpayers should not have to support illegals and their children.

The **working class has become the forgotten class** because the rich and corporations who already have everything and far beyond what they need are hogging the profits and not paying livable wages to working people. **If they simply paid livable wages to working people our economy would prosper much more than is now an it would be a win win for all** even the rich. This has been proven by new economic studies. (See Ted Talk The dirty secret of capitalism -- and a new way forward by Nick Hanauer https://www.youtube.com/watch?v=th3KE_H27bs) When corps also look out for the welfare of their customers and workers everyone benefits and the economy improves. In Seattle the old economists warned that if you give workers \$15.00 an hour it would cause massive layoffs and hurt the economy. But when the workers got that big raise the economy actually boomed because the workers had more money to spend. Many old economic theories are obsolete. Greedy people are sociopaths who are not good for anything including the economy. It has been found that we can have a better economy if we pay workers more.

We should ban mass robo calls to cell fones. Every day I get dozens of robo calls. The police report that most scams are by robo call telemarketers. We have become a society afraid to answer our phones. But be sure you have a way for emergency callers to leave a message. Sometimes that's very important. As a red cross worker I once had a woman who missed out on being with her dying soldier son because she wouldn't answer the phone. And that he died.

Science, caring, cooperation and wise management have done more for mankind than anything else. We need more research into prevention and cures for diseases and antibiotics because the bad bacteria are becoming drug resistant faster than we are finding new antibiotics. And we need to find ways to stop bad viruses. We need affordable Medical Care for all. Americans pay between two and 100 times more for medical treatment and medicines than people in other countries. People have received bills for hundreds of dollars for hospital visits in which they were not actually seen by a real doctor or treated. A MRI in Japan is around \$100. Here it is often over a thousand dollars.

There are at least 30 countries that are poorer than us that have better universal Medical Care for all citizens. If they can do what why can't we? The answer is greedy corporations, greedy CEOs, and lack of government regulation which we obviously need because the corporations are not regulating themselves. The corporate greed in the medical industry has become a racket and ordinary citizens are being extorted. We need to fix that since the big drug companies have gotten excessively greedy and are charging what the market will bear to give their executives many millions of dollars each and to make excessive profits. This has reached an extent that the average person can not now afford some medications some medical treatments or a hospital stay. These excessive medical prices have forced many citizens into bankruptcy. Seniors are doing without needed medication and medical care and people are dying in America and that includes children. This is absolutely unnecessary and we need a fix it because a is wrong, and unjust. And a major reason why this is happening is that congressman are taking huge donations from medical corporations to favor them in legislation. Congress gets over a billion in campaign donations (bribes) every year from them. Congress is no longer working for the American people but for corporate interests and profits. We need to vote incumbent congressmen out of office.

Since the medical industry has failed to regulate themselves it appears that the government will have to do it instead. Medicare for all would regulate drug prices. Insist on your state legislatures making medical charges public and regulate drug corporations so that they're not allowed to hurt people anymore and cause people to die

200 corporations pay no income tax because Congress gets millions from them to let them not pay their fair share. End the tax loopholes for corporations. This is called corporate welfare. If they do business in the USA they should be paying taxes here. Nestle for example should be at least taxed for the Michigan water it gets free and makes billions of profit on. Those taxes could be used to fix the roads rather than burden us citizens with fees that are so high that many can't afford to own a car. Which wouldn't be so bad but our weak mass transit system is insufficient often to get people to jobs and other places then need to go. (Look at NY where one can usually get within one block of needed destination and rapidly.) Why has Congress acted to enrich the rich and ignored the needs of most Americans and why has it bankrupted the country while providing billions in corporate welfare and tax breaks to the wealthy? **China now supports its military on interest from loans to America.**

Too many people have been killed or otherwise died needlessly and with needless pain and suffering. And the same for thousands of species of animals. When we lose millions of species, like what is happening now, it will affect our source for future drugs and antibiotics as they often the source. As Peter, Paul and Mary often sang **"How many deaths will it take"...to know that "TOO MANY PEOPLE HAVE DIED?"** **We have lost over 10,000 Americans in Afghanistan and Iraq needlessly** because we did not learn from history and they are still being killed there recently in this cesspool in a useless wasted war now going on 20 years. And now there are increasing attacks by jihadies on Americans and innocent people around the world.^[2019] There are much better ways to solve problems than killing each other such as diplomacy, discussion, fact finding, mediation, science and even games or perhaps just get out of the cesspool. Part of this is because there are corporations making money off of our wars for example "Helliburton" made \$39 billion from our soldiers dying in Vietnam. This is Greed rearing its ugly head. Corporations putting profit over human lives. Humans are Humane monsters aren't. Too many of the rich and those in power are sociopathic monsters of sort. To see other humans suffering and not at least make some effort to help them is both wrong, cowardly and selfish. The old saying: money is a root of most evil, or perhaps greed is the cause of most evil. Greed after all is the religion of the super rich. A big fact of history is that too many people have died needlessly and for too long for thousands of years and it's still happening now. Science, caring, cooperation and wise management have done more for mankind than anything else. We need to keep a country strong but still have very good diplomacy.

History is very important for the practical experience and lessons it provides.

We can learn from history and do something about it.

Also threatening now is the growth of Big Brothers around the world including the USA. For those of you who are winking an eye at this you had better wake up and look at China today. Big Brothers are in every citizens life big time and affecting their lives even taking their lives. Everything you do when the Internet on your fone all of your financial information all of your locations all of your social media where you drive your car and input from cameras in public areas are all recording information on you. Now this is great for security but it's also giving would be a big brothers the opportunity for scientific dictatorship. With the rise of electronic money which has now taken over probably over 90% of money transactions it has become possible for big brother to turn off credit cards and other nasty maneuvers against

people they consider dissidents. As of 2020 This has not happened here but it has become possible. 1% should not be in control of 90% of things. We already live in an oligarchy which is rule by the few. There could be dangerous times ahead and we better be vigilant.

Our freedom of speech is threatened by Saudi control of the big media companies, so reporters are afraid to tell the truth. **Be aware that there is a big group that wants to pass anti hate speech laws which sounds great but is really a ruse to stifle criticism of their anti American ideology and Sharia law. Europe made that mistake and is really sorry now. Above all don't limit our freedom of speech.**

Education in the USA is now below many 3rd world countries. I did a survey of several hundred high school graduates and discovered that less than half could find the United States on a blank map of the world and that less than half know who we fought in World War II or why and if you ask a lot of employers they'll tell you that many Millennials can't even make change for \$20.00 bill. **Other countries help college age students to get their education.** Here it is the opposite. We can and should provide every person with at least two years of free college or vocational training and place them in internships so they become self supporting. Michigan would benefit. They would get better pay and pay more taxes over years so it actually pays for itself and it is a win a win for all.

We need life 101 classes in high school, and need final exams in every grade because too many students are called it off all day of school in not learning and that's their job to learn. I am a college teacher and a done a study and have found that the education that our children get today is often not as good as the education children got in a one room schoolhouse. If you doubt that take the eighth grade exam from a one room school house on page 58.

Students should exit HS with an education ready for life, with vocational training.

Most people are in favor of ending Daylight savings time because it causes many deaths every year due to car accidents. A proven fact. To please the tourist industry just make it whichever way they like but all year.

Conclusion

There are too many children and adults without adequate food, shelter, clothing, medical care, education, affordable housing, a safe environment, decent transportation and others who care. In this modern age we can fix all of that. There is no longer any excuse for governments not providing for people while thousands of the wealthy and corporations wallow in excessive wealth.

There is no need for the greed. Greed needs to be limited. **The needs of the many outweigh the greed of the few.**

Humans being humane and science gives the most benefits to mankind.

Wise planning and management provides benefits for all.

The wise is action is to do the most good for all and not cause harm by actions or inaction.

Kindness is needed everywhere now. Promote Kindness

Let's Improve things for all. If it is be it is up to me.

Why not improve things?

We can learn from mistakes made in the past.. We can together find better ways of doing things and share them and improve things.

Discussion and dispute resolution are better ways to solve disputes than wars.

We have started an IMPROVING THINGS FOR ALL THINK TANK to share ideas on how to create a better present and future. You are welcome to join (its free). Go to <http://dogoodforall.today> website and click on **Think Tank**.

Your ideas are welcome and needed.

One Religion Love, One Conduct Kindness, One Government Freedom, One Law Justice, One Education Truth, One method Science, asking the 7 Questions Why, What, Who, Where, When, How and Why not?

We had better learn from history or we are doomed to repeat stupid mistakes from the past.

Martin Moore Operates Courtesy Gas Station

Martin G. Moore, proprietor of Courtesy Service Station, Warren, pictures that village as being in the path of progress, close to Detroit and Mound Superhighway, eight minutes from the heart of the greatest automobile manufacturing center in the world. The hegira of Detroiters to Warren will assume large proportions as soon as Mound is opened up, he predicts.

Increased community spirit, more business places and home-building activities were listed by Mr. Moore as ingredients necessary to village progress.

Handle Tires

Mr. Moore was born in Sterling township on Jan. 31, 1892 and attended the Sterling district schools. He worked as salesman for Warren Service Garage company and as yard superintendent for Mellon-Wright Lumber Company, of Royal Oak, before opening the filling station business in Warren on Oct. 2, 1927 with J. B. Moore

batteries and accessories, as well as gas and oil.

Fishing is "Mart's" hobby, hunting his favorite sport. During the war, he worked on Howitzer guns and Enfield rifles in Dodge Brothers factory.

He married Miss Olive Hartwig on Feb. 21, 1914. They have four children, Evelyn Jeanette, 13, Marvin G., 11, Elaine K., 9, Carol J., 2 years old.

Includes Four Garages
And Two Service
Stations

There are 23 business enterprises in Warren, four of which are garages and two gas and oil stations. The establishments and their owners follow: garages: Warren Service Garage, Eckstein-Lakie company, Gerlach Garage and the Warren Chevrolet Sales; bank, the Warren State Savings; barber shop, Fred Gibbs; A. V. Church Lumber company; Warren Sweet Shop; two contractors, Fred A. Warshaw and Chris Foss; Paul Gager, M. D.; Church Radio and Electric company; Courtesy Service Station; Martin Moore's Gas Station; Halmich's General Store; Diehl's Cash Grocery; John Malburg's Hardware; Lutz Hardware; Joseph Langell, painter; Ark W. Moss, plumber; H. L. Claes and company, plumbing and heating; Henry Walters Shoe Store and the Warren Cooperative company.

Schmidt Is Proprietor of Chevrolet Motor Sales

Business Was Opened In
April, 1927; Covers
Macomb County

Edward E. Schmidt, proprietor of Warren Chevrolet Sales company, came to Warren as a resident in 1922 because he considered the village a nice place in which to live.

He was born in Clinton township Oct. 1, 1894 and studied in Clinton district school and Mt. Clemens and Detroit public schools before starting in a garage in Detroit at the Grand Boulevard and Gratiot avenue.

After working in several auto-

mobile factories and with Eckstein-Lakie company, Ford agents, he opened his present business in Warren in April, 1927.

Handles Accessories

In addition to Chevrolet motor cars, the company handles auto accessories and Goodyear, Firestone and Goodrich tires. Its sales and service covers Macomb county with regular garage equipment and a new suction cart wrecker. Two persons are employed besides the owner and proprietor.

During the World War, Mr. Schmidt was employed in Detroit automobile factories and as mun-

Crops

The main occupation of the population in Michigan in the 1800s and early 1900s was agriculture. The main crops in Michigan were: Wheat, Corn, Clover, potatoes, apples, beans, cherries, pears, sugar beets, grapes, peaches, dry beans, celery, oats, rye, plums, blackberries, and hay . The Michigan Historical Museum's website states "Michigan farmers began growing beets for sugar in the late 1890s. The first sugar beet factory opened in southern Michigan in 1898. Farmers needed additional laborers. During the 1910s and 20s, Eastern European immigrants were hired to cultivate and harvest sugar beet and potato fields. In the 1920s, as these immigrants found jobs in the auto plants and elsewhere, Mexican and Texan seasonal workers began coming to Michigan to harvest sugar beets and other crops." "Soybeans, not widely grown before 1920 except as feed for livestock, received a boost from Henry Ford in the 1930s. His "Henry Ford and Son Laboratories" developed uses for soybean oil in auto lubricants and paints and for soybean meal to make a sort of plastic for auto parts such as gearshift knobs. In fact, Ford made a whole car out of his soybean formula—but he never found a market for it." see

<http://www.hal.state.mi.us/mhc/museum/explore/museums/hismus/1900-75/erlyagri/crops.html> On the same website above is another piece of history. "Michigan Agricultural College (MAC, now Michigan State University) professors laid the foundation for scientific advancements in Michigan agriculture. Researchers experimented with various crops, tested orchard fungicides and insecticides, evaluated seeds and fertilizers and raised livestock on different feeds to learn the most cost-effective way to produce the best meat, crops and dairy products." "Roadside Marketing in Michigan, Agricultural Experiment Station Bulletin 185, month 199##MAC Agriculture Agents became the link between the college's research and farmers. They introduced new farming practices and scientific advances to farmers through extension bulletins and workshops. They organized home extension groups for farm wives and 4-H clubs for farm children. They provided information on soil, crop research, farm markets and ways to obtain credit." "Frank A. Spragg of MAC fostered the organization that became the Michigan Crop Improvement Association in 1917. The association improved the quality and reputation of Michigan certified seed by inspecting and approving members' fields. Spragg made Michigan the leading producer of navy beans when he introduced the "Robust" variety in 1915. He also developed Rosen Rye and Red Rock wheat, two varieties that improved the production of these grains in Michigan. Spragg's Hardigan alfalfa, introduced in 1920, eased the way for Michigan farmers to turn from growing grain to dairy farming." Read why there were 49,000 silos built in Michigan in 1919-1920. Read what the Silo did for the farmer and why barn design was changed.. Go to

<http://www.hal.state.mi.us/mhc/museum/explore/museums/hismus/1900-75/erlyagri/barnsilo.html> Macomb County had a population of 31,627 in 1881 with 296,055 acres of accessed land Michigan also produced 88 million in agricultural products, 60 Million in Timber, 2 million in salt, 1 million in fish and 8 million in copper (up north). Every farm had its garden with numerous vegetables and most had an orchard with apples, pears, peaches, plumbs etc. Of course most farms had a raspberry patch perhaps the most tastee of all. In the late 1800s and early 1900s the raising of cattle for meat and dairy farms were a big item. Growers sometimes use minimum till or no-till methods to prevent excessive soil drying. This means that the ground is not ploughed every year. 2

SEARS MOTOR BUGGY

**SPEEDY, ECONOMICAL,
NOISELESS, DURABLE
AND SAFE
A CHILD CAN RUN IT**

\$395⁰⁰

FOR CAR COMPLETE WITH RUBBER TIRES, TIMKEN ROLLER BEARING AXLES, TOP, STORM FRONT, THREE OIL-BURNING LAMPS, HORN AND ONE GALLON LUBRICATING OIL. NOTHING TO BUY BUT GASOLINE.

**ALL SPEEDS FROM
1 TO 25 MILES
PER HOUR**

No. 21R333 Sears Motor Buggy, complete as described below. Price..... \$395.00
No. 21R444 Sears Motor Runabout, without top and fenders, but otherwise as described below. Price..... 370.00
Shipped from factory, crated so as to secure the lowest possible freight rate. Shipping weight, about 1,400 pounds.
EXTRAS IF WANTED—Acetylene Lamps with Generator in place of the two front oil burning lamps..... 12.95

WHY WE BUILD IT AS WE DO

In designing the Sears Motor Buggy we had in mind a self propelled vehicle to take the place of the top buggy and runabout; we had in mind a substantial, well built, economical, safe durable and noiseless machine; we had in mind a maximum speed that was reasonable and fast as anybody should ride; namely, 25 miles per hour.

With these things in mind and knowing what was needed throughout the country, we set about several years ago experimenting with different automobiles. We examined all the different principles used in the construction of self propelled vehicles; we examined the most successful cars to find out what they were using in the way of tires, wheels, axles, springs, transmissions, etc. We found that all the successful high grade cars were fitted with TIMKEN ROLLER BEARING AXLES, we therefore used them on the Sears Motor Buggy; we found that for regular road work there was nothing better fitted or more durable than a Sarven's patent wheel; therefore, you will find Sarven's patent wheels on our Sears Motor Buggy. We found that a wheel about 36 inches in height was the proper height to give the road clearance necessary and to give the most satisfactory service and the least vibration. We found that there was more resilience, more comfort and more service in a FULL ELLIPTIC SPRING than there was in any other type of spring; we, therefore, hung our Sears Motor Buggy on four full elliptic springs. We found that all the heavy powerful automobiles and automobile trucks were fitted with DOUBLE CHAIN DRIVE FROM THE REAR WHEELS; therefore, you will find the double chain drive on the Sears Motor Buggy. We found that the fastest cars, those that were making records for speed were built with the double chain drive. At the Automobile Show in Chicago, held in February, 1909, we noticed that the car that won the New York Paris Race was built with a double chain drive, we also noticed that the car that won the Vanderbilt Cup for making the fastest time was built with a double chain drive. We found that there was a maker of automobile frames that was making 75 per cent of all the frames used in automobile construction in the United States. We found on account of the volume of business that this concern could make frames cheaper for automobile manufacturers than the manufacturers could make them themselves. We went to this frame maker and asked him to make a frame for our Sears Motor Buggy and then to name us prices for these frames in large quantities, the result is that the angle steel frame of the Sears Motor Buggy is built by experts who build 75 per cent of all the automobile frames used in the United States today, and so on throughout the entire construction of this Sears Motor Buggy you will find every piece and part has been given the most careful study, you will find that the Sears Motor Buggy is made of the best possible material; it is constructed to take the place of the top buggy; it is built in our own factory under the direct supervision of our own expert, a man who has had fifteen years of automobile experience, a man who has for the past three years been working with us to develop the right car for all kinds of service, and we honestly believe that in this Sears Motor Buggy we have exactly the right car for the people, at a price within the reach of all.

There are a great many buggies with engines attached that are being offered for sale that are nothing more than makeshifts. No ordinary buggy is built to stand the racket and strain given it when machinery is attached. Our Sears Motor Buggy is designed and built from the ground up to carry the engine and machinery necessary to make it run. It has special rubber tires, special wheels, special axles, special springs, special body; in fact, everything is special and is much stronger than other motor buggies, and it will outwear two of any other make. At the same time, while we have the strength and durability in this motor buggy, we have designed it so that it is pleasing to the eye, neat and light in construction and appearance. It is not heavy or cumbersome. Whether you buy a Sears Motor Buggy or not, we want to urge you, in your own behalf, not to purchase an ordinary end spring buggy with some machinery attached, as they are not practical.

Our Sears Motor Buggy will give you the greatest amount of service with the least amount of operating expense. It is comfortable, safe and durable. We have not made any attempt, in designing and building this Sears Motor Buggy, at copying the automobile. We have made no attempt to build a high speed or a high powered car. We do not believe that the average man desires to go whirling through the country at 40 to 50 miles an hour. We furnish in our Sears Motor Buggy a practical car for use every day in the year over rural or city roads; a car that will climb the hills and go over any of the roads that are ordinarily found in any part of the United States.

We have given this Sears Motor Buggy practical road tests in different sections of the country, through sand, through mud, up hill and over all kinds of roads. This car will run a great deal faster than you will ever want to send it over rural roads and can maintain a speed twice as fast as the usual speed regulations in the cities and towns permit.

Our price of \$395.00 is for the car complete, as illustrated and described above. We furnish everything, including 1 gallon of lubricating oil. You have nothing to buy when you receive the car but gasoline. For the convenience of some people who do not desire a complete car, we state in our list of prices the amount we will allow if top or fenders are not wanted; we advise, however, that you order the complete car, as sooner or later you will want the complete outfit.

TERMS

Our only terms are cash; we do not sell on installments or extend credit. Send us your order and enclose our price in the form of a post-office money order, express money order, bank draft or check. If you don't want the motor buggy now, send us \$25.00 as a deposit and we will enter your order in its turn and then later on you can send us the balance when you want us to make shipment.

We ship with the understanding that each and every car is to be exactly as represented and described, and is to be made of the best material and parts obtainable for the purpose. We guarantee every car to be thoroughly tested and tried out; in fact, given road service. We guarantee that it will run through mud, sand, over ordinary city and country roads and take all reasonable hills. Our Sears Motor Buggy under test has demonstrated conclusively that it is a great hill climber, and we have taken roads and hills where regular automobiles could not follow.

Learning from history can prepare us for the future. Science is a method to find how, why and what. Basically it is looking for truth not uneducated opinions. How does one get good information. First ask enough questions to get a good understanding. Then verify things. Then we ask how to apply this knowledge to help all of mankind.

We know that the electric car is more efficient, needs less repairs, lasts longer and actually costs less to make. There are a lot of people who are fighting against them because they are making money on our current inefficient obsolete cars. Electric cars have been around a long time and have proven themselves.

Here is an old electric car, one of hundreds from the old days. Someone in 1960 put a solar panel on top to charge its batteries and it worked.

<https://offgridworld.com/100-year-old-solar-powered-electric-car-powered-by-the-sun-in-1960/> Now we have many electric cars about to come into production but we don't have charging stations around the country. The answer for the short time is to go with hybrids. A small gasoline engine keeps the batteries charged or the car can be plugged in. The batteries are also charging when the car breaks, so it is very efficient. Electric scooters and golf cart like vehicles have also provided themselves very efficient. There are scooters that fold up into luggage.

Charging battery with wheel motion

Great and needed things we have learned, what you had better know from many years of experience. Great Ideas for your Success.

Be a Success With proven Success Practices From Experience of Experts Bits of Wisdom

**Be a Success with People Skills, Real Life Experience
and Proven Success Practices.**

Great Ideas For your Success

Bits of Wisdom Things not taught today.

**Kindness, caring, listening, asking questions, Science
and thinking are Solutions to most problems.**

Think for yourself. If you don't others will think for you
at your expense.

Don't believe everything you hear or even see. Be
skeptical. Ask enough questions to get all of the needed
information correct. Use reliable sources especially not
from hearsay or obsolete uneducated opinions from the past
or old books.

If in doubt say Really! Prove it. Is it actual and factual truth.
Humans and computers need accurate information. I taught
technology classes at college level for 30 years and still do.

Technology says Garbage In Gives Garbage Out.

Don't accept nonfactual info or opinions unquestionably.

Avoid bad info and emotions as they will cripple you as
will bad chemicals or unhealthy or **unknown substances**.

Avoid drugs. Many may addict you even on first try and
get a hold on you and will not let go. He snorted stuff down,
soon they put him in the ground. She popped an unknown
pill. It caused a painful death. Made everyone sad. Many
lives have been needlessly ruined or ended by drugs.

Don't ride in a car with a driver that texts or looks at phone
while driving because they kill many innocent people, often
children, needlessly every year.

If you want to be a success, Think Success.

Decide what you want to do, **Plan** how to accomplish it. **Make a plan then work your plan.** Later evaluate and improve. You must have a burning desire to succeed. By the way part of success is staying alive. Think Safety and Survival. Plan for them. Yes seriously. Many don't and many of die needlessly. Al walked on the RR tracks with his headphones blaring so he did not hear the train which killed him. Think!

Experience teaches one should be vigilant for threats to your safety and health and **make** dealing with them the **highest priority**. Many who did not do that died. Many people don't look as they cross a street. In England I had to look to the right before I crossed. Good thing I did because there was a very quiet car coming from the right. If I had not looked I would have been killed. This booklet is about learning from experience of others that can put you ahead.

Be aware of what can kill you:

Volatile liquids as gasoline can explode if there is even a small spark or heat nearby. Also never pour them onto fire.

Food Poisoning from unclean utensils, dishes, wrappers or food not stored in hot or cold or preservatives or insufficient cooking so as to not kill harmful bacteria and parasites.

Arguing with unknown, unstable, hostile persons. If they are agitated best to avoid them, speak calming words.

Negative thoughts, emotions and especially anger can cause one to do things we regret later. If angry remember that it affects your judgement so best while angry to defer action.

© 2019 Professor Wesley E Arnold

page 2

What can kill you continued Being in **path** of moving objects (cars, trains, machinery) walking on RR tracks with loud ear fones(modern spelling) Being in a cold or hot environment without adequate protection. Being in environment with plants, animals, beings that can be hostile.

Avoid Negative people, as they are poison. Seek positive faithful friends. **Avoid gangs** as they can get you killed. Enemies can disguise as friends or nice persons. Better find them out and avoid them, before it's too late. Ask them to say a prayer for the both of you in your presence. It will reveal if they are in a cult and their thinking. Ask them open ended questions to get their feelings on issues. Such as "How do you feel about....?" **Be aware of your surroundings** and to possible threats. **Be prepared.** Have a plan worked out in advance. **Think safety in everything you do.** Wear safety glasses and ear sound dampers. When pushing hard on tools think about what will happen if it slips. Most accidents are preventable. **Diving.** Find out how deep the water is before diving into it. Always assume guns are loaded. **Never point a weapon at anyone, even put a finger on a trigger** (some will fire with **very little pressure**) Never draw something out of a pocket and point it at an officer. Police officers have to deal daily with criminals with guns. Many innocents were shot because they appeared to be pointing a gun. Officers are trained to shoot first because there is often just not enough time and many officers have died because they hesitated. Keep your **hands up** and in sight.

3

Negative thoughts can lead to depression and can make you destroy yourself. A negative thought (ant) is just a little thing and can be overcome. First resolve that you will not give them power over you. No matter how bad it is you are still the captain of your ship. You determine what thoughts you think. It is all right to think a fact thought that may be negative such as "I am depressed, or "I have failed" Check it to see if it is really true and if it is learn from it. Think "So I failed what can I learn from this?" Then make a new plan to achieve your goals. The best way to get something done, is to begin. If depressed your mind will sometimes make it even worse and you must reach out for a little free help from a crisis line

586 307 9100 800 273 8255

Take one step at a time. If it is to be it's up to me.

Your life touches many others in ways you are not aware of. If you die you would leave a black hole and cause others sorrow. Your loss is their loss also. Even one who has few or no friends has the potential of helping oneself and others. The world is full of lonely people and many who desperately need a few minutes of kindness. Great satisfaction can be yours in showing kindness to another and can make a huge difference in people's lives. **Better to light a candle than to curse the darkness.** **Thoughtful defensive non distracted driving saves lives.** Anticipate actions. If someone looks like they may change lanes or pull out in front of you get a foot on the break just in case. Leave adequate stopping room in front of you. Use lights at near darkness and during storms. Being unprepared, not watchful, or distracted can cause loss in life as well as driving.

5

Think safety, practice safety. Learn First Aid and CPR. Keep an eye on children to protect them. Keep anything that could harm them out of their reach. When cutting only cut away from your body. Water with electricity is dangerous. Also avoid downed wires and metal fences. Use safe practices when climbing or when anything is a potential risk.

The following is survival advice from experts.

If a **terrorist** or **active shooter** is nearby, Escape if possible, lock door, lights out fone on silent, be out of sight. Tell those around you that if the terrorist comes in they can either do nothing and die, or get his gun down and get him down and all will live but it will take several people. See videos on Internet on this such as Run, Hide, Fight. Lock the door, and put chairs and other things in the doorway. If Terrorist enters **throw things at him to distract him,** Even a one second distraction gets you time to act to **push gun down.** This takes people out of target area. Push behind his knee (which causes knee to fold) **take him down one person on each arm and leg, then pile on top of him. Keep him down** use all force necessary to keep him down and get gun away. Put waste basket on top of gun. To not take gunman and gun out of action is a death sentence.

If you spot a person with a lot of something wrapped around them get away and call police may be a suicide bomber.

And the same for masked women and men because unless it is super cold there is no need for a mask. No one needs to hide their face in America slavery has been outlawed here.

4

If you are in the **least doubt about a decision** or if much emotion is involved it is probably **best to set it aside** for a while, sleep on it to let the subconscious mind work on it. Since a very great percentage of the mind is subconscious it is wise to use it. If there is not time than **at least seek calm-wise council** and listen. Take time to ask infinite intelligence what to do. Then listen for the quiet answer that may come when you wait for it and are willing to receive it. God sometimes gives answers through your own thoughts. **Search for the best, most wise action.** Be sure to **consider all alternatives and possibilities.**

Take Time To **Think.** It Is The Source Of Power.

Take Time To **Read.** It Is The Fountain Of Wisdom.

Take Time To **Love.** It The Greatest Thing In The World. Love makes everything a little easier.

Be **Cheerful.** It Is The Road To Happiness.

Take Time To Be **Friendly.** It Is The Best Way To Get Along With Others. I have found that even friendly acquaintances may help you greatly. I was told by a personnel manager that she hired me because I had smiled and was friendly.

Take Time To Do What Jesus Taught. (Love One Another, Kindness) It Is The Key To Happiness.

Take Time To **Plan And Work.** They Are Keys To Success. Those who are successful think and work at being a success. **Get knowledge** that will let you use opportunities. **Many job openings go unfilled because no one has the knowledge needed.** Some employers will even pay for training.

6

Ben Franklin's wise Maxims:

Silence: Speak only what will benefit others or yourself.

Order: **Let all things have their places.** Let each part of your business have its time.

Resolution: **Resolve to perform what you ought.** Perform without fail what you resolve.

Frugality: **Make no expense but to do good to others or yourself; that is; waste nothing.**

Industry: **Louse no time. Be always employed in something useful.** Cut off all unnecessary actions.

Cleanliness: Tolerate no uncleanness in body, clothes or habitation. Tranquility: **Be not disturbed at accidents,** common or unavoidable, or at trifles.

Temperance: **eat not to dullness, drink not to elevation**

Sincerity: use no hurtful deceit, think innocently and justfully and speak accordingly,

Justice: **wrong no one** by causing injuries or omitting your duties

Moderation: avoid extremes, forebear resenting injuries so much as you think they deserve

Wisdom and Humility: Imitate Jesus and Socrates. **Avoid assertive criticism** rather say "It appears to me...or If I am not mistaken " **Be skeptical. Ask Questions.**

Ben Franklin's schedule. Early to rise

Ask What Good can I do today? **Plan**, Set time aside for thinking, reading, and for work. Before bed ask What Good have I done today? Evaluate actions. Get adequate sleep.

The greatest good is to do good for the community.

7

Quitters don't Win & Winners don't Quit.

Desire success. Desire that goal. Be Determined.

Set some time aside for reflection and planning.

If you fail to plan you are planning to fail.

Think about what to do to be a success. **Get the needed knowledge, make a plan, figure a way.** Find a need that you can fill and people will pay you, just one good idea is sometimes all it takes. Set aside a short time for thinking.

James Allen in As a Man Thinketh said:

A **wise** person: **controls** his **thoughts** and thereby his actions; spends more time in study and thought; questions most everything; tries to find the truth; makes the best use of his time; avoids time traps such as entertainment. A wise person knows that **success**, happiness, worry (is a waste of time) love, suffering, health and actions all **stem from thought**. Character is the sum of ones thoughts. You are and do what you think.

To change yourself change your thinking. You have freedom to choose your thoughts. If you want success you must think success. You are completely responsible for your own thoughts. You can't blame anyone else. As you continue to think so you will remain. You are limited only by the thoughts you yourself choose.

The **wise** man **organizes**, prioritizes controls, & disciplines his thinking. He **rejects negative, useless**, idle, irrational, **emotional, worrisome**, lustful, purposeless thoughts. (except to relax and sleep)

Better management uses scientific finding of best practices and wise management

8

Most problems are **caused by failing to get enough information, and also by insufficient thinking.**

Do what you can one step at a time. When angry count to 100 before you speak. Think of the consequences first. To test ideas ask: Is it the right thing to do? Is it **fair** to all?

Be observant. Look for opportunities.

A good technique in getting ideas is called **brainstorming**.

Gather 1 or more thoughtful people together and brainstorm a question. Write down every idea no matter how trivial without question for twenty minutes. Then later go over each idea looking for other ideas. Still later one can sort out the better ideas. **Seek expert advice from more than one source** when making decisions out of your area of knowledge. Surround yourself with the best people you can find.

Knowledge is power. Learn a skill or get knowledge that businesses and people will pay you good wages for. Chose a job you love and you will never have to work a day in your life.

Automation will soon replace thousands of human jobs.

Don't go into jobs that will be automated.

Education pays. There are thousands of free classes online, including college and vocational classes. Do a Google search. YouTube has millions of free educational videos. Also you can take free or low cost classes to get knowledge then take a test for credit. People with degrees make more money but sometimes the knowledge not the degree is what gets the job. Community colleges are a best bargain. Khan Academy has **hundreds of free video lessons** on many subjects.

9

Many people get great satisfaction in doing good things, that leave our world of people a little happier. The world has many lonely, lost and needy people. Young people need good guidance and examples. **Look for opportunities to do random acts of kindness.** Instead of paying me back pay it forward, help another.

Just being friendly smiling and saying hello is an act of kindness. Buy a meal for someone, or help someone. All humans need to feel loved and secure. The world can be cold and cruel. **Even a small kindness can bring great happiness to both giver and receiver.** Everyone can do little things that benefit mankind and that may make a difference in bringing happiness. I am an old man and find that little kindnesses that others did brought me much happiness as do remembering kind acts I did for others that gave me satisfaction for years. **Happiness after all comes from inner satisfaction.** Music can also be a great source of joy. Find music you like and perhaps even learn to play an instrument. That is also great for your maintaining a sharp mind and living longer. To many, **the greatest happiness** comes from knowing that they have helped needy others which makes the world a better happier place. Other people are also your greatest resource. Likability works and benefits all. First impressions are important. Look them in the eye, smile, say Hello

A recent Harvard 75 year study showed that good relationships lead to much happier lives and living longer. See The Good Life Robert Walinger TED Talk on YouTube.

<https://www.youtube.com/watch?v=8KkKuTCFvzl>

10

So much information is available now that it is difficult to sort out which to look at and what is true or not. Our news is

censored and biased. Special interests own large percentages of our news media resulting in news that is slanted to their wishes. **Look for reliable sources that quote real sources. NPR, PBS and a few independent media are good.** Google News gives several sources. But **be skeptical.** Ask enough questions to get all of the needed facts and verify them. **Limit your input to things that matter.** Eliminate trivial topics and outdated material.

Learn how to learn. Find what works for you like hand printing notes, quizzing self, & flash cards. Learn how to take **quick notes.** When time is short use abbreviations. Leave out vowels, Later rewrite the notes while the lecture is still fresh. **Review and Repetition works. Taking notes works.** Cursive is faster than printing. If you have a fast speaker, use a recorder. Think and Ask the 9 learning Questions What, Who, Where, When, How, Why. Is it **factual?** Is it **verified?** Is it **up to date?** **Beware of untruths and half truths.** Insufficient, thinking, fact gathering and not caring are the major causes of deaths and suffering. **Use scientific method.** Science applied with wisdom has done more for mankind than anything else. **Seek the truth.** Don't take anyone's word for it require proof. For fast Knowledge first consult Wikipedia. The following have millions of free books: Internet Archive <https://archive.org> Project Gutenberg, International Children's Library. Also **book reviews can save you time.** Library of Congress has much online. Also see your local research librarian.

11

How to Win Friends and Influence People by Dale Carnegie has great ideas some of which are: **To influence others talk about what they want and show them how to get it.** "First arouse in the other person an eager want." If you want people to like you become genuinely interested in them. Make a good first impression. **Smile.** It costs nothing but creates happiness and sometimes pays well. "Be a good listener. encourage others talk about themselves." Talk in terms of the other man's interests.

Make the other person feel important sincerely. **Avoid arguments.** Use "I may be wrong but..." **Ask questions. Find the facts.** Use "It may appear that..."

Show respect for others opinions. Avoid telling them they are wrong and if you are wrong admit it quickly. **Find things you can agree on.** Like Socrates **ask questions** that will get a yes answer. Get him saying yes. Let the other person do most of the talking. Plant an idea. Later let them think the idea was theirs. **Try to see things from the other person's point of view.** Be sympathetic with others ideas and desires. Refer to mistakes indirectly so as not give offense. Talk about your own mistakes first. Ask questions instead of giving direct orders. Could you please do... You might consider Give suggestions. Offer a challenge. Let the other person save face. In other words be considerate. **Use encouragement.**

Encourage even the smallest and every improvement.

Make things you want done seem easy to correct or do.

Make them happy about doing what you suggest.

Give honest appreciation.

13

Best time proven ways to get along with people. Only do to others as you would want done to yourself. (AKA The Golden Rule) First impressions are very important. This includes body language. **Being friendly including a pleasant greeting and kind words.** I have seen this pay off many times. Look directly and face the other person. **Listen** to them and indicate you heard their point. **Sometimes summarize** what they said. Look at things from their point of view. **Find common interests on things.** Establish rapport, common ground, The key is to learn how to become like them. **Avoid criticizing, negativity and direct contradiction.** Don't use "absolutely, certainly, undoubtedly."

Rather say "It appears to me... or If I am not mistaken...or imagine... What if?" **Stick to the positive. Look for the good in others and things.** I have seen people get fired or relations fail because of negativity. If criticism is to be done it should be done in a positive, constructive way. Begin by criticizing oneself first.

Franklin said Things unknown should be proposed as things forgot. Become a humble doubter. **Ask Questions like Socrates.**

Know what you want listen for what you are getting. Change what you do until you get what you want. People like to hear their own name in a greeting and in positive ways. **Praise others often. Find something good to say even in a bad situation.**

Learn how to facilitate people believing in you and accepting your ideas. People skills are a most important asset. There are lots of good books on this and other important skills like how to improve your memory.

12

I have listed over **5,000 scholarships on my website** and more information to help students and job seekers.

See <http://dogoodforall.today>

Use microphone on your fone to do a quick Google search for information on whatever you want to know.

I have observed that if listeners synchronize with the person talking to them visually, and vocally it shows the other person that you are listening and that you are like them. Facing them, matching the speed and tone of voice creates a psychological bond. We all like people who are like us.

Express that you desire to be of help to them. Get their email or texting address. Stay in touch with those who can be of help to you. **Be careful of what you do on social media** as it is recorded for posterity in archives and employers may see it. Many people have been fired over something they posted online. **Avoid bashing people or putting yourself in bad light.** Future employers often look at candidates actions on social media. Your

Google searches can be bought by anyone such as a future employer. If you had a health class and searched for a terrible disease a future employer may see that and since he has many applications may throw yours away just to not take a chance that you might have it. **Your reputation and attitude precedes you.**

Actions speak louder than words. Your body language and gestures are stronger than what you say. **Being diplomatic and friendly pays much better** than complaining and negative actions. Friendship increases by visiting friends, but not too often.

14

There are better ways of resolving disputes than killing. (diplomacy, discussion dispute resolution, and mediation)
Look at two family men shoving a sword thru each other in a war.
 Neither one has anything against the other.
What does painfully killing each other solve?
Humans should always be courteous and civil.
Humans are Humane, monsters aren't.
Humans cause no harm by our actions or inaction.
 Because if we don't there is so much power now available to individuals that misuse of it can cause our extinction.
 Active Listening is a great tool for human relations.
 Acknowledge points they said or summarizing shows you are listening and care. Great for dealing with emotional complaints.
Things to learn that may save your life: Basic survival, How to build a fire without matches. How to put out fires. How to make a solar still to get pure water, find food, Have a good first aid kit.
 Most people are not prepared. Read a survival book. Visit scouthandbook.info **It may save your life.**
Learn self defense because it may also save your life.
Recognize that a threat to one as a threat to all. Divide and surprise attack are proven formulas for victory. To disarm the people is the best way to enslave them.
Too many have died needlessly and it continues today around the world. 10% of conflicts are caused by differences in opinion and 90% by the wrong tone of voice or terrorists. When there are two groups who do not understand each others language conflict resolution is difficult. In disputes they find it easier to fight which often leads to needless killing.

15

Ben Franklin a very wise man, stated I will speak no ill of anyone because he found that criticism made enemies. A true friend is the best possession. Hear no ill of a friend, nor speak any of an enemy. **If you would reap praise you must sow the seeds, gentle words and useful deeds.**
 People want to feel important. Make them feel important.
Instead of condemning try to understand.
Find something to praise about the other person.
Express appreciation often. If you want someone to do something you need to make them want to do it.
There is great Importance in maintaining contact with and good report with family, and friends. Automation will replace many workers in near future. See "Humans Need Not Apply" on YouTube. Life is rare in the Universe. **Science gives us accurate knowledge, engineering applies that knowledge. Technology gives us wonderful tools** but applying technology without love, kindness and wisdom is dangerous. Learn to **keep calm, thoughtful and in control regardless of situation.** This gives you a great advantage.
 Nothing is as important as this day and the Love and Life in it. Diplomacy gets you far more than complaining or rage. Nobody likes complainers. Look for opportunities. Be your own salesman of yourself. First impressions are priceless
You don't know how much you know until you know how little you know. You Know! Keep up to date on important things. Read more, listen to informative podcasts. Surround yourself with positive, wise, drug free, knowledgeable friends.

17

The Easiest Language is a quick solution to non understanding. It is an **International Vocabulary** which speakers of English already know 2000 of its words. Only 16 grammar rules with no exceptions. **It is learnable to a basic fluency in 1 month. It is the easiest, fastest and the least cost solution.** It helps language students learn other languages faster. it allows communication between different languages (in 1 month) which is much less time than learning any other language which takes years. It is the most time and cost efficient solution to the language misunderstanding problem. It is called Esperanto. If children spent 10 minutes a day learning this our planet would have a common language in a few years and many lives would be saved, some conflicts and wars avoided because humans need a common understandable language especially in emergencies. And vacations are enhanced because you can get information from people who live where you are going. For a free book see <http://easiestlanguage.info>
 Join **Esperanto** groups on Internet and chat with people in over 100 countries. Make friends Save money on travel. I had friends who traveled around world staying in friends houses. Had a great time. Get easy language college credits in much less time. Ben Franklin said **Dost thou love life? Then do not squander time, for that's the stuff life is made of.**
Lost time is never found again.
 Waste not life in the grave will be sleeping enough.

16

What is the solution to people mistreating each other? We need an expectation that all humans be required to practice such as:
Humans are Humane Monsters aren't. Cause no harm by actions or inaction. Make that the expectation and Law and enforce law to protect all.
 Demand responsible behavior from all.
 Another way of expressing this is the Golden Rule which is: Only do as you would want done to yourself. Wise ones like Jesus for centuries have advocated this. Confucius, and Socrates put it in the form of the Silver Rule. Do not do to others what you would not want done to your self. It should be taught to children. Law is an agreement on how things are to be done. Things work better with law rather than brute force.
 History shows we still need defenses. Indians sometimes had forts. Cities and outposts had walls. **Houses and cars have doors and locks. Use them.** There are people who would steal your things so don't make it easy for them. Keep your valuables out of sight, locked up, and make several copies of your data. USB sticks are great. MicroSD cards are tiny.
Be always watchful. Learn self defense. Be Prepared.
 We should help create and maintain a caring world for ourselves and those with whom we are in contact daily. We never know when we may need help ourselves. You have the power to increase your happiness and make a difference by looking for opportunities help others. It is better to light a candle than to curse the darkness. If everyone improved their own area what a wonderful world this could be."
Be happy and cheerful. Give others your smile.

18

With so much mis-information out there how do we get the Truth? First try to get good verifiable sources. Be skeptical ask enough questions so as to get needed information. Then verify from several reliable sources. Insufficient facts always invite danger. **Question everything.** Don't assume. Ask why. Think. If you train your brain to be scientific minded you have much better understanding. **Learn how everything works** because being scientific minded gives you an advantage over the many who are living in fantasy ignorance land. Example learn how to **set up your own solar panel for free electricity** to charge your fone and laptop and you will always have power and light even when the rest of the world is dark. Do it yourself for under \$100.

You can set it up inside in a window or outside on a rack of inexpensive PVC pipe using zip ties. Paint ties white so they are not damaged by sun. Best avoid roof if you have snow to brush off. Use more efficient Mono-crystalline or new Perovskite panels. Point their flat area directly at the sun at mid day. Add a charge controller to prevent boiling the battery. Deep cell golf cart batteries are best. Decent used car batteries are cheaper. Get an inverter converts DC to AC so you can use your other electrical stuff. Shop around save money. Add more panels and batteries to get more free electricity.

See <http://dogoodforall.today/freesolarpower.pdf>

Real knowledge is to know the extent of one's ignorance. Study what is most likely to happen in the future so you will be prepared. Look especially for opportunities. Look at the Occupation Outlook Handbook online.

19

Live as if it is your last day alive, as it actually could be.

No one knows.

Have the courage to speak the truth and stand up for right.

To see the right thing to do and not to do it is cowardice.

Wisdom stands the test of time. Observe the good points of others and adopt them. Observe bad points of others and correct them in yourself. **Do not waste your time as it is valuable and priceless.**

You can never get back a wasted day. Life is short. Time is money. Great minds discuss ideas, average minds discuss events, small minds discuss people.

Scouting offers great opportunities camping, hiking, flying airplanes, canoeing, horseback riding, High Adventure Trips, Philmont Scout Ranch, D-A, Parks. **Scouts learn leadership, success, people skills, survival skills,** (see picture of **solar still**. Just a piece of plastic can save our life.) emergency preparedness,

CPR, First Aid, safety, swimming, life saving over 100 merit badges on many occupations & interesting hobby interests such as: Electronics, Energy, Engineering, Environment, Medicine, Boating, Music, Robotics, Salesmanship, and many more. **A Scout is Trustworthy, Loyal, Helpful, Friendly, Courteous,**

Kind, Obedient, Cheerful, Thrifty, Brave, Clean Reverent. Scout motto is **Be Prepared.** Slogan Do a Good Turn Daily.

21

The most important words in human relations

I ADMIT I MADE A MISTAKE (the most important 6 words)

I AM PROUD OF YOU (most important 5 words)

WHAT IS YOUR OPINION (most important 4 words)

IF YOU PLEASE (the most important 3 words)

THANK YOU (the most important 2 words)

We (the most important word)

I (the LEAST important word)

Put more "We" in your conversations. In disagreements work on common interests and solutions. Being diplomatic and friendly pays much better than complaining and negative actions. Beware. What you do goes around and later comes around. Your actions may eventually come back to you.

If it is to be it's up to me. When the going gets tough the tough get going. Know yourself. **Be aware that the world is not a nice or safe place there are those working to take away your freedom, valuables and income.** Being aware of who and what is around you is a great idea. **Planning in advance what to do** in hostile situations can save your life. Because automation will within a dozen years cause much unemployment if pandemic or war doesn't happen first, we **will need to have a basic income for all which can be done by putting solar panel farms all over on public property (could use free prisoner labor) then give an equal share of the huge profit from the free solar energy to every citizen.**

Everyone could still work if they want to. This could end welfare and lessen crime. Also read up on the Venus project and Jacque Fresco. **Grandpa's thoughts follow:**

20

We are beginning a trans-human era with implanted devices being put into people. Blind will see. Deaf will hear. Paralyzed are walking. Artificial arms and legs are now working. Artificial organs are coming. Science, kindness and wisdom have done more for mankind than anything else.

Mu chips as small as this dot · will be put into people, pills and nearly everything else to track things, for inventory, and theft prevention. Mu chip powder can be sprinkled on produce bad batches can be then be tracked and lives saved. Read up on Mu chips. Bots (automated programs) will do jobs for us. Robots will be serving us. Robo cops may police us. Gorts may solve the violence problem. We need to keep our brains active by thinking. **Exercise your brain do addition and multiplication in your head when bored.** This can be beneficial and improves your thinking. Eat properly to feed your brain better. See Dr. Daniel Amen's book "Use your brain to change your age" (Improve your body so it functions as if it were younger.)

Smoke and CO² detector alarms with good batteries and fire extinguishers nearby save lives. Avoid natural Christmas trees as they ignite easily and burn fast. It's the fumes that kill you not the fire. **Make an escape plan and make sure everyone knows it and also to get down low to avoid fumes and most important get out.** I speak from experience I was a fireman. **When you meet new people that you want to keep as friends or acquaintances make yourself memorable.** Find something that sets you apart from others give them something to remember you by. Be the reliable good friend.

22

The Universal Declaration of Human Rights
lists our most important human rights.

The basic law of our land is the US Constitution which purpose is to establish justice, insure domestic tranquility, provide for the common defense, promote the general welfare, and secure the blessings of liberty to ourselves and our posterity. The Bill of Rights is first 10 amendments. First Amendment guarantees the freedom of religion, freedom of speech, of the press, of assembly, and of petition to the government for redress of grievances.

Privacy is important, otherwise risk of identity theft, they can empty your bank account or run up charges on your credit, People government and corporations are collecting info about you, can have wrong info, cost you jobs, or could hurt you. **Don't give out your personal information.** Employers and Government, can and do spy on your email, personal calls, Internet usage, banking, credit, locations, your Google searches, Facebook and more.

Don't post anything bad or "flame" others on social media because there are others who relish attacking you if they disagree.

Of course **we all need to stand up for what is right and have the courage to do so.** There are too many cowards who do not. If you don't stand for something then you stand for nothing. **We veterans are proud to have stood up many times** for what is right and continue to do so in spite of threats. To not do so would be cowardice. We also defend freedom of speech. **Don't fall for anti hate speech laws as it is just a ruse to stop speaking the truth** about terrorist groups and their cult. 23

This world domination cult: is mentioned here because it is a threat to you (some of my friends have been killed by them); has nearly 2 billion members who secretly support it's own Sharia(Islamic) Law and political system which denies equal rights to women, girls and non believers and allows killing of non believers. Facts show they are responsible for thousands of deaths of innocent persons such as travelers, shoppers, even children world wide (9-11 3,000 innocent people killed and in air plane, car, truck and suicide bombings) **Hundreds were murdered last year and this continues into today with endless bombings & killings worldwide.** **This is verifiable** see factual lists on "thereligionofpeace.com" and List of Islamist terrorist attacks on Wikipedia. They hide their true plan (taking over) like a stealth enemy or cancer continually growing bringing in thousands more of them and having babies by multiple wives who can go on welfare so we end up supporting them. They are asked to not cause trouble. Meanwhile they infiltrate government and businesses. History shows when they get a majority they take over. Then their peaceful character reverts only to their members and all non believers get taxed or killed and all other religions are stomped out. **To verify this just look at** any country they have taken over such as Iran, Pakistan, Afghanistan, Syria, Iraq and going on now in Africa.

Its not the small religion praying part, but rather much larger political and physical actions that are hurting girls, women and killing non believers. Actions speak louder than words

Learning from others experience and history can serve you well and **may even save your life.** It is far better to learn from others experience and from history because you don't go thru the pain and suffering and sometimes dying.

Here are a few things that history shows us:

All persons die, many before old age, many from drugs, many because of criminal behavior, many because they did not seek or get timely medical treatment, many because of their own unthinkingness, and many because of bad associations. Many died because they lived in a time or place of rule by brute force instead of rule by law. For many thousands of years our ancestors lived in tribes which were constantly at war. Look at a World Almanac history section shows endless and needless wars usually over land or religion. Once rule of law is established such as in the

USA most of the fighting is resolved by law and by law enforcement. If you have a problem you call 911. In addition there is Human Rights Law such as our Bill of Rights and The **Universal Declaration of Human Rights.** Some **rights are:** **right to Life, liberty, security, not to be a slave,** no cruel treatment, trial, innocent until proven guilty, privacy, to own property, freedom of thought **freedom of speech** and media, take part in the government, social security, fair pay for work, adequate standard of living, and education and that everyone has duties to support these rights for all. History also shows us that there is at least one big ideology that has violated these rights for over 1400 years and worse continues to seriously violate Human Rights even killing many this year and could be a threat to you.

We do not just get wisdom we discover it. **The only learning is self-learning.** Life has its happy times and sad times, good times and terrible times. **Learn from them** but enjoy things when you can. Take moments to enjoy beautiful flowers and clouds. Self esteem, what you think about yourself is very important. Look at what you have done and you will see that you have done a lot and that you are a capable person.

This is the beginning of a new day. God gave me this day to use as I will. To waste it, or use it for good. **What I do with this day is important, because I have given one day of my life for it.**

When and if tomorrow comes, today will be gone forever. Remember I paid one day of my life for it. Hope I will not regret the price I paid for it.

On many a grave headstones glisten of those who heard but wouldn't listen. Victor RaCosky said "You are who you run with. And When you think you are down and out hit them one more time." Many epitaphs are wise:

Be thankful for what you have-Life. Do the most good while you can before it is too late. Use time wisely waste it not for all too soon this (the grave) will be your lot.

The worst evil of all is uncaringness.

We veterans are not cowards we have stood up to those who abuse helpless women and children and those who kill innocent people. We are against abuse of women and girls, slavery, oppression, and killing. I speak out because to not do so would be cowardly. Join me in speaking out against abuse.

A hero is a person who does what was right or who is really intent on making this a better place for all even in difficult circumstances. **If you don't stand for something you stand for nothing.** A lot of cowards just take the easy way out and don't even try. Join me in standing up for freedom with liberty and justice for all.

Do It Now. I expect to pass through this world but once. Any good thing, therefore, that I can do or kindness I can show to any fellow human being let me do it now. Let me not defer nor neglect it for I shall not pass this way again.

What are examples of Best Human Conduct of great leaders?

Starting with WWJD being that our country was founded on Christian principals. What Would Jesus Do? He taught exactly what most of the world considers is the most accepted rule for human behavior the Golden Rule Only do as you would have others do to you. He Taught Love One Another, not to kill, steal or commit adultery. He did not own slaves or a harem. He stopped a woman from being stoned to death told her to go and sin no more. He was kind to children and taught all should be kind like the good Samaritan. He did not participate in any wars.

If we ask **What would Confucius Do or Socrates, Buddha, Gandhi, Dolly Lama, Martin Luther King** or in fact most heads of religions **the answer would be the same as would be their actions.** The Golden Rule is the Accepted Western and World Standard, but it is **not found in the Quran** which promotes killing of non believers 9-5, sex with prepubescent little girls 65:4, wife beating 4:34, slavery and unquestionable submission to the cult. This is verifiable and there are many more verses on these so you can read it yourself. See <http://thereligionofpeace.com> for many more facts. 27

There are lies, half truths and propaganda out there. Seek the truth. **Ask enough questions to get needed facts.** Don't trust uneducated opinions, hearsay or obsolete books. Get verified facts. **Think.** Ask is it actual and factual? Prove it.

More Ben Franklin Quotes

Forewarned is Forearmed Listen to reason or get hit by it
The Best way of Serving God, is Doing Good to man.

Do good to thy friend to keep him, to thy enemy to gain him.

Nothing is so popular as goodness.

Happy Wife, Happy Life. A good wife and health is a man's best wealth. Good sense all need, few have.

Early to bed and early to rise, makes a man healthy, wealthy, and wise. Diligence is the mother of good luck and overcomes difficulty. God gives all things to industry.

Love your enemies, for they would tell your faults. Thou can not joke an enemy into a friend, but thou can a friend into an enemy.

Think before you speak. Don't throw stones at your neighbors, if your have windows. **Want a faithful servant? Serve yourself.** God helps them that help themselves.

You ought to be an honor to your family. Glass, China, and reputation, are easily cracked and never well mended. If you do what you should not, you must hear what you would not.

When there's no law, there's no bread.

Great talkers, little doers. Eat to live, live not to eat.

To lengthen thy life, lessen thy meals.

A penny saved is a penny earned.

29

Historians ask WWMD What would (did) Muhammad Do? is also the same as what he did and taught which is well documented. He is considered the perfect example of human behavior by 2 billion people. Well here is the historic truth like it or not. **Verified by many accurate biographies, Bukhari, Quran, Sira & Hadiths** He claimed that God's angel spoke to him often. He became a warrior who participated in raids against mostly peaceful peoples. He came up with powerful ideas: that of jihad which is war ordered by God to expand Islam; and not allowing followers to leave under penalty of death; and all peoples being forced to submit or be killed or sold as slaves. He ordered his men to loot, plunder kill all of the men and boys, and take all of the women and children as slaves. He had his men rape the women and he demanded a 1/5 cut of all bounty and women for his harem and encouraged beheadings. He had a young mother stripped of her nursing baby and painfully stoned to death. He had repeated sex with a 9 year old little girl. Since he is considered the perfect example this and slavery is now legal in Islamic law today. They made a lot of money out of selling slaves for 1,400 years continuing into today. He had anyone who disagreed with him or even doubted he was a prophet, killed and this has been the practice for 1,400 years continuing into today. He presided over the beheadings of 800 peaceful non believers. As king of Arabia his warriors bloodily conquered the Middle East, and many other parts of the world including much of Africa killing 250 million mostly innocent peaceful persons, selling their wives & children into slavery & stealing all of their property. He was the world's greatest military leader. The above actions are verifiable from hundreds of documents. But should we use WWMD as a standard of conduct?

Problem is not the small religion part but the much larger political and physical actions hurting girls, & women and killing non believers. Actions speak louder than words. Many think we should use WWJD because

Humans are Humane. HaH

28

Search others for their virtues, thyself for thy vices.

Observe all men: thyself most.

Haste makes waste. Well done is better than well said.

Better slip with the foot than with the Tongue.

Pay what you owe, and you'll know what is your own.

Borrowing will go a Sorrowing.

Tis easier to suppress the first desire, than to satisfy all that follow it.

Let my discontents be secrets. Blessed is he who expects nothing, for he will never be disappointed. Folly & Wickedness shorten life.

He who falls in love with himself will have no rivals.

When the Wells dry we know the worth of water. Tis easier to prevent bad habits than to break them.

Who is strong? He that can conquer his bad habits.

Neglect mending a small fault and soon be a great one. A stitch in time saves nine. **Don't underestimate the power of small things.** A loose nut can cause a hatch to open and sink a ship. Beware of little expenses. A small leak will sink a great ship.

Death takes no bribes. One Today equals two tomorrows.

Half Wits talk much but say little.

Many a man thinks he's buying pleasure when he is really selling himself a slave to it. The way to see faith is to shut the eye of reason. Keep thy shop and thy shop will keep thee. Drive thy business or thy business will drive thee. Fish and visitors stink after three days.

The sleeping fox catches no birds. Up!

30

Those who are wrapped up in themselves make small packages.
 Leisure time is a good time for doing something useful.
 Diligence is the mother of Good Luck.
 Would you live with ease, do what you ought,
 and not what you please.
 Industry, Perseverance, Frugality make fortune yield.
Hide not your Talents, they for Use were made,
 What good is a sundial if it sets in the shade?
 A lie stands on one leg, truth on two.
Whatever's begun in anger, ends in **shame.**
The things which hurt, Instruct.
 A soft Tongue may strike hard.
 Paintings & fightings are best seen at a distance.
 End of Franklin Quotes

Be aware of what your government is doing. Special interests and corporations have been buying favors from your lawmakers at your expense. We have had the resources and technology to provide abundance for all for a long time, but the wealthy greedy have been hogging the resources and wealth and our working class has become the ignored class.

Ideals ONE RELIGION **LOVE**, ONE CODE **GOLDEN RULE**,
 ONE GOVERNMENT **FREEDOM**, ONE LAW **JUSTICE**,
 ONE EDUCATION **TRUTH**, ONE METHOD **SCIENTIFIC**
 which is asking Questions and finding the factual truth, ONE
 EXPECTATION **HUMANS** are **HUMANE**, ONE
 POSTULATE **WWJD?**, ONE WAY **KINDNESS**.

31

Grandpa's experience: **Question Everything**, Bring No Harm by Actions or Inaction, Join With Me to Stand Up for Freedom With Liberty and Justice for All, **Kindness** and **For Completely Free Speech**, and **against abuse of girls and women and against, subjugation, slavery, cruelty and killing.**
 Think for Yourself, avoid drugs, gangs, negative people, texting while driving, Think Safety, Be Prepared.
 If you want to be a success, Think Success.
 Decide what you want to do, Plan how to accomplish it. Make a plan then work your plan.

and happy
solutions to
most problems.

Wherever there is a
human being, there
is an opportunity
for kindness.

This guy was texting while driving....they
found the phone still in his hand.
They found his head in the back seat.
Make sure all the young people you
know see this.

The Easiest Language from University Research and International Vocabulary with 2 way Dictionary

Language mis-understanding has caused: deaths of 583 persons needlessly in an airplane accident on the ground and hundreds more in other non-understanding caused accidents. Hundreds of deaths during medical emergencies. Hundreds of children kidnaped but the police could not understand the mother's language. Thousands of fights and killings because people did not understand each other and did not clear up misunderstandings. Even some wars could have been avoided and thousands of lives saved by understanding. **HUMANS NEED TO UNDERSTAND EACH OTHER NOW.**

The solution is here. There is an easy to learn international vocabulary that can save lives here and around the world. Humans need to understand each other especially in emergencies. If a woman is trying to tell a doctor that her child drank poison but the doctor doesn't speak her language or tell a policeman that someone took her child, or two gang leaders want to settle a dispute, or a pilot is being told to do something by a traffic controller, or people are being given directions on how to escape from a sinking ship, **THEY ALL NEED TO UNDERSTAND EACH OTHER** at that moment **OR LIVES WILL BE LOST.** Hundreds of people have died because of language non-understanding. There is an easy solution. In Ten minutes a day people can learn an International Vocabulary, even children in elementary grades. Within a month they could have basic understanding. Enough for basic and emergency communication. If you know English you already know over 2000 words in this language. It only has 16 rules of grammar with no exceptions. We could have understanding between all languages within a short time if students would be taught this for 10 minutes a day in elementary school. Thousands of lives could be saved. Every human could understand every other human. For more information **Visit <http://easiestlanguage.info>**

The easy solution is the easy to learn International Vocabulary Esperanto (no it is not Spanish) you already know 2000 of its words. It has been suppressed by teachers of other languages because it is so easy. Here are some sites.

Kara Sinjoro
Mi ricevis via letero. Mi estas studento en la alta klaso. La inteligenta personoj lernas. Internacia lingvo estas la moderna, kultura lingvo por personoj. Simpla, fleksebla, estas la praktika solvo de la problemo de internacia interkompreno + meritas vian konsideron. Mi havas 99 Esperanto leteroj korespondantoj el 45 landoj. Tiu personoj parolas 112 lingvoj. Mi komprenas 2 lingvoj. Mi deziras foto sur foto papero. Mi uzas Nikon per foto. Mi fokus de beefsteak kun freŝa tomato + bona freŝa orango. Mi muzikas klasika muziko per piano + violino. Mi haro estas bruna. La temperaturo estas ne varma mia hato + lipo estas blua. La rivero frostis. Mi ne vidas la krokodilo, birdo, elefanto, + girafoj. Mi trinkas varma ĉokolado + kafeo en restoranto. Mi uzas mia malnova komputoro por prepari letero. Mi havas sukceso. Mia telefono havas nova numero. Mia adreso estas la sama. En mia urbo estas granda parko. La infanoj ludas kun hundoj kaj katoj. Mia hundo nomas Rover. Li estas bruna. Mia kato havas bruna + blua haro. Mia birdo estas blua. Radio programo

SOLAR POWER FREE, INEXHAUSTIBLE, CLEAN, PERMANENT DO IT YOURSELF under \$99. to charge fones, have lights, run tablet computer. To run laptop and TV add \$100 for bigger power unit. Everything is easy just set panel in window and plug in to battery-power unit. Only two items to buy Solar panel and battery-power unit. Add extension cord if needed.

Power units can be charged by solar panels, or by car or by AC. They put out AC and DC and can charge fones run computer, power lights, radio, TV etc.

Optional
light
weight
flexible
panels

Above can be a portable power set up for camping or survival, or to power a home and things like refrigerator, furnace etc. add more panels and deep cell golf cart batteries. The blue box below is a \$30 charge controller that protects the batteries from over charge. The orange thing is a \$30 inverter that changes the battery output of 12 Volts DC into regular household 110 AC. See my free article or book on dogoodforall.today.

Panels can be set inside by a window or outside leaning against house, or on a rack made of cheap PVC pipe with zip ties to fasten panels. Or racks can be of 2x2 wood, or metal L angle pieces. Or panels can be put on brackets on the roof. I took mine down after a snowstorm as was too dangerous to clean off up there. Panels can also be hung from gutters. You can also buy ready made parts as below.
